🎨 How to Customise Your Design

Once you've chosen your options:

1. Click the **"Customise This Design"** button on the product page to open the Label Editor.

2. Enter your desired text into the box for your selected label size.

3. Customise your design:

   - **Text** – Click on the text to edit font, size, or colour.

   - **Background** – Click on the label, then use the colour tool to choose a background.

   - **Large Labels Only** – Add two lines of text and customise the colour band.

💡 **Tips for Best Results:**

- For **Black & White labels**: use black text on a white background or white text on a black background.

- For **Colour labels**: choose text and background colours that don't clash.

- Avoid placing labels over **creases** (e.g. on garment tags), as this can reduce adhesion.
